DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8, 10, 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Benzoni (US 5,416,668).

Re claims 1-3, Benzoni discloses a shield cage (20, 24) having a plurality of walls (26, 28, 30, 32) comprising mounting tails (62) or flexible mounting tails (90, 100), a receiving structure (48, 50)

Re claim 4, sheet metal SMT tails (Figs, 3, 4)

Re claim 5, elongated tails (see Figs 3, 4)

Re claim 6, wave solder tails (solder 80) (Fig 2)

Re claims 7, 8, an insertion stop structure (60) is provided outside the region of the mounting tails (Fig 1)

Re claim 10, at least one position pillar (48, 50)

Re claim 14, the invention is capable of functioning as claimed.

Claims 1, 9, 10, are rejected under 35 U.S.C. 102(b) as being anticipated by Harting et al (GB 2303258).

Re claims 1, 9, Harting et al discloses a shield cage (1) having a plurality of walls (7, 8) comprising mounting tails (9), a recess (Fig 3)

Re claim 10, see Fig 3

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-13, are rejected under 35 U.S.C. 103(a) as being unpatentable over Benzoni

The teaching of Benzoni as discussed above including a plurality of extensions (60) (re claim 13), but does not disclose the shielding cage is made of a die cast material such as brass having a thermal expansion coefficient substantially equal to the thermal expansion coefficient of the circuit board.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to optimize the material of Benzoni et al for intended use since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art.
